Facial Depression

It's not just a collagen problem.

Facial fullness

Composed of structural molecules such as collagen, elastin, and glycosaminoglycans

And the supporting subcutaneous fat pads work together to maintain

As we age

Natural aging is compounded by various external factors such as ultraviolet radiation and pollution.

It will cause the internal structure of the skin to gradually degenerate.

When **areas with lower fat content lose their underlying support**

This can **lead to tear troughs, sagging cheeks, and deepened nasolabial folds** .

Different facial depression problems

Although many skincare products are effective in anti-wrinkle and firming...

Many options have been provided.

there are still very few formulas that can **directly target dents.**

...

Bulky Face Caused By Facial Fillers

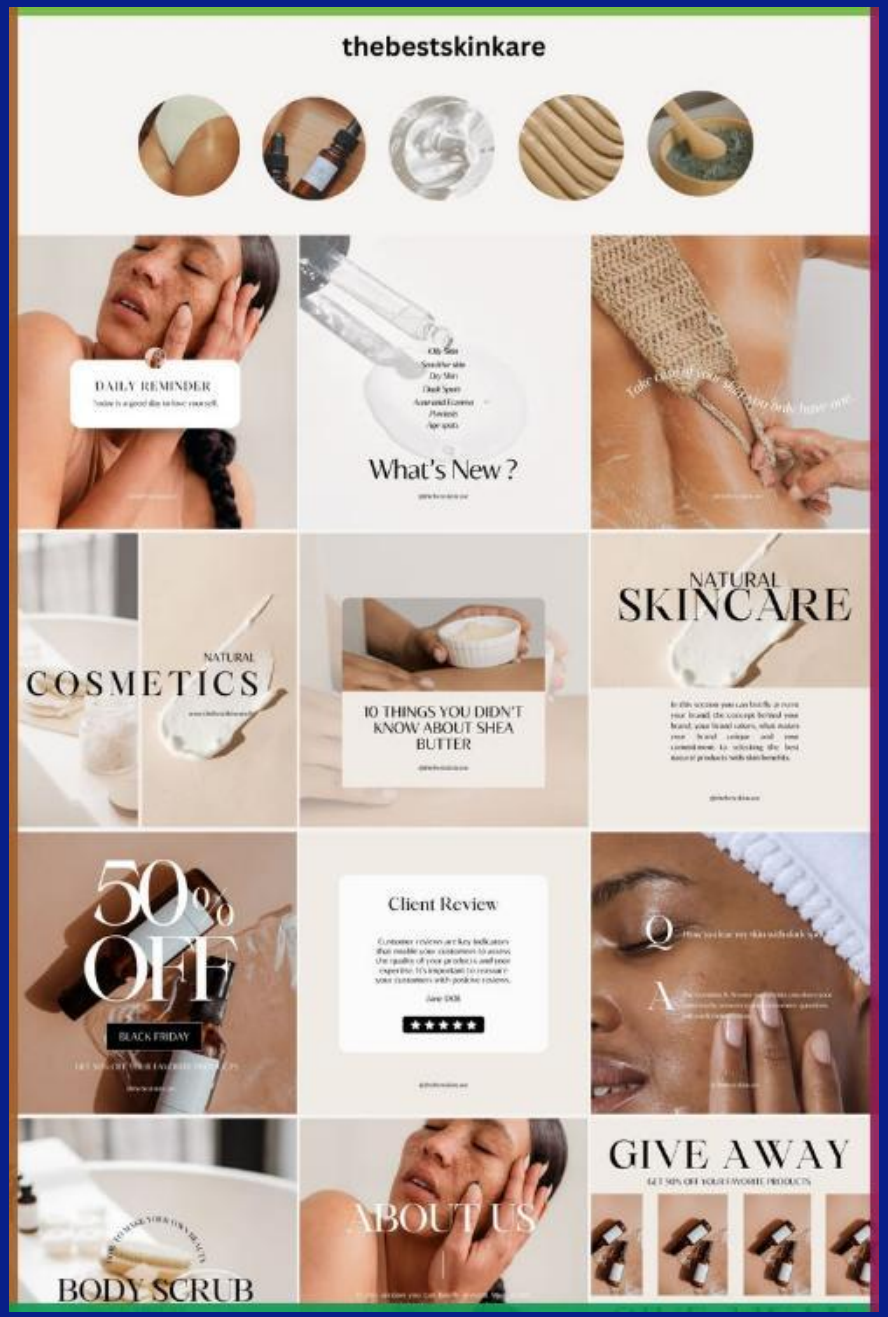

Structural Changes In The Anti-Aging Market

From " **Invasive cosmetic procedures** " to " **NON-invasive/minimally invasive beauty treatments** "

Data Insights:
According to Frost & Sullivan data, the size of China's medical aesthetics market exceeded 300 billion yuan in 2024. Among them, "light medical aesthetics" occupies more than 80% of the market share with its core advantages of "low risk, short recovery period and high frequency".
In non-surgical aesthetic medicine, injectable treatments (hyaluronic acid, botulinum toxin) and phototherapy treatments (photorejuvenation, radiofrequency skin tightening) constitute the core pillars of light aesthetic medicine.
Z (born between 1997 and 2012) contributes over 50% of market demand. They regard cosmetic procedures as "routine skin management" and generally intervene in early signs of aging around the age of 20 with Botox (to prevent dynamic wrinkles) and basic hyaluronic acid injections (to moisturize and stabilize), forming a consumption habit of " **early intervention, frequent maintenance, and low intensity** ".

This generational shift has spurred the extreme demands for anti-aging products:

- Safety First: **No recovery period, no irreversible side effects, no "frozen face"**
- Enhanced efficacy: From single-function moisturizing to multi-dimensional anti-aging (firming, wrinkle reduction, plumping, and whitening)
- Convenient and frequently used: Everyday topical products are the best partners for medical aesthetic procedures.
- Costs are controllable: the average price of a single light medical aesthetic procedure is 800-1500 yuan, which forces the improvement of the cost-effectiveness of beauty and anti-aging products.

Beauty.

" **Facial Plumping** ": The next major battleground in the anti-aging industry.

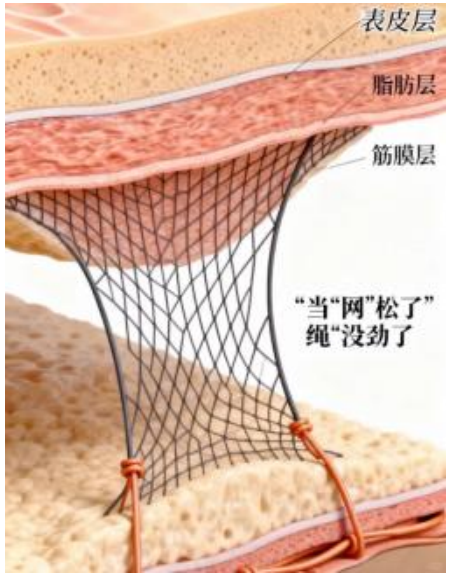

Skin aging is not a single problem, but a collapse of all layers: dry epidermis, loss of collagen in the dermis, and downward displacement of subcutaneous fat pads. Traditional anti-aging only focuses on delaying damage, while the core logic of the new generation of anti-aging is: **first plump, then firm, and finally reduce wrinkles** .

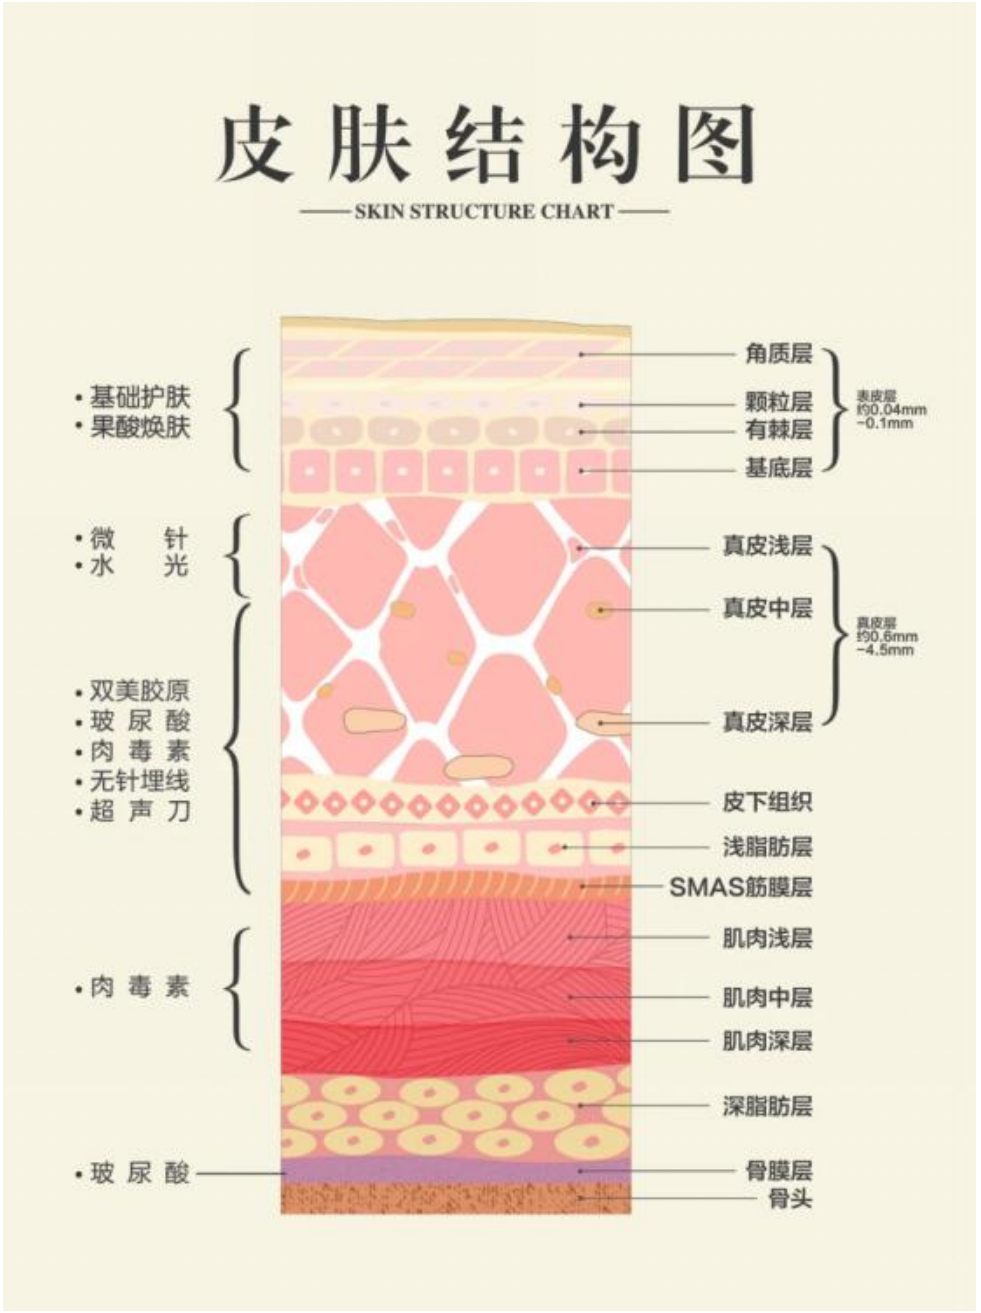

Signs of aging include sunken tear troughs, sagging cheeks, deepened nasolabial folds, and hollow cheeks.Essentially, they are all external manifestations of insufficient adipose tissue volume .

At which level does fill take effect?

Facial soft tissue can be divided into five layers from superficial to deep.

skin layer	The outer layer and the inner layer are leather, with a thickness of approximately 1-4 mm. Responsible for barrier function and appearance texture
Superficial fat pads	Located in the superficial layer of the SMAS fascia, it accounts for approximately 70% of facial fat and is primarily responsible for the roundness of facial
SMAS fascia layer	The key support layer connecting the skin to the deep structure
Deep fat pads	Located between the facial muscles and the periosteum, it accounts for about 30% of facial fat and is responsible for deep facial support and three-dimensionality.
Periosteal layer	The connective tissue membrane covering the bone surface provides the underlying support framework for the facial structures.

Plumpness.

How to achieve without surgery

Achieving Facial Filler ?

Volufiline

Plant-derived "Self-Plumping" Black Technology

Innovation from "External Filling" to "Autologous Augmentation"

Volufiline™ (patented by Sederma/Croda, France)

INCI: Hydrogenated polyisobutylene, Anemarrhena asphodeloides root extract

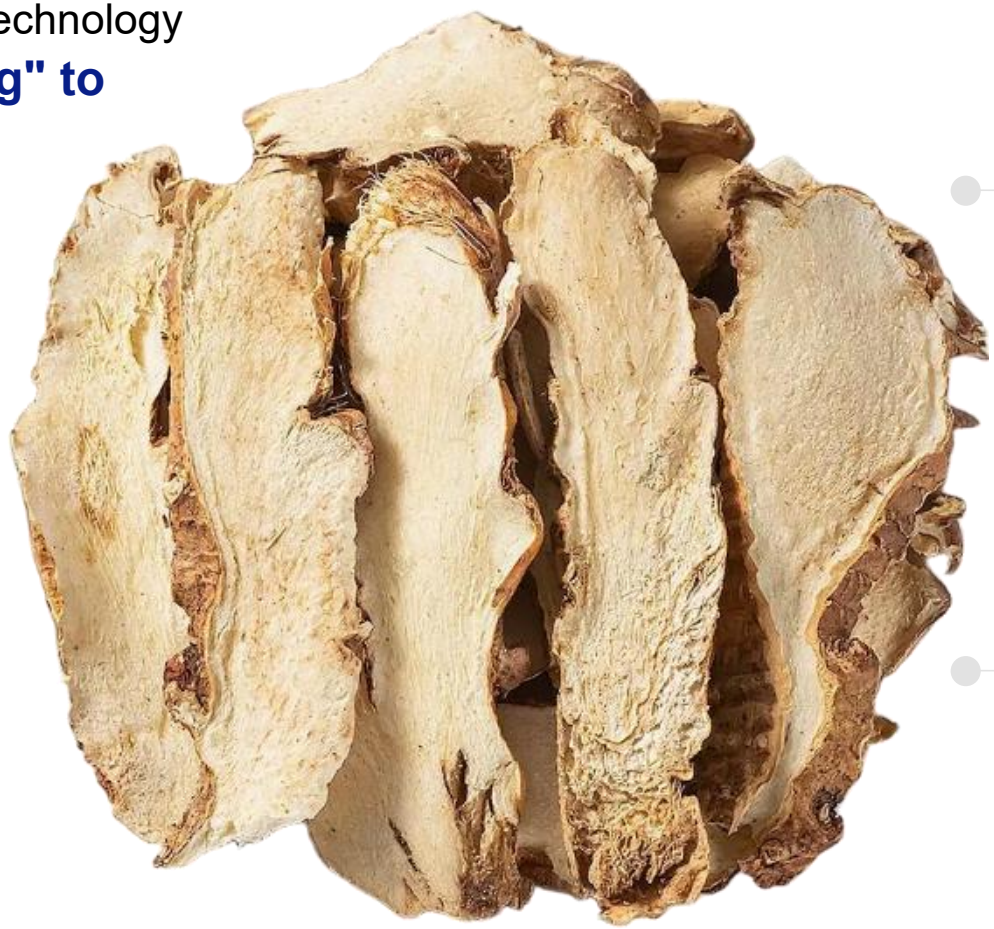

Core active ingredient: Sarsasapogenin , phytosterol, hormone-free.

Application: Developed around 2000, officially launched to the market in 2006, and the patent was published in 2013.

Non-invasive

nature

No rejection

2026

Application History

2000 origin

Body augmentation/sculpting, buttock/thigh contouring, and improvement of subcutaneous fat.

2015 face

Facial fillers/anti-aging

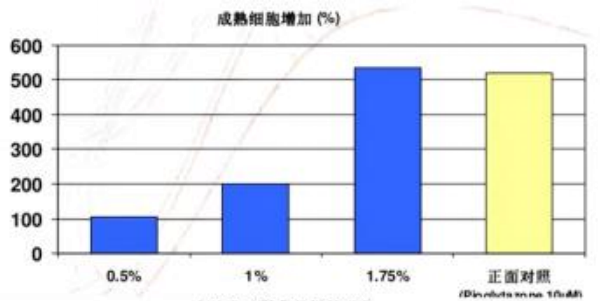

Repositioning in 2022

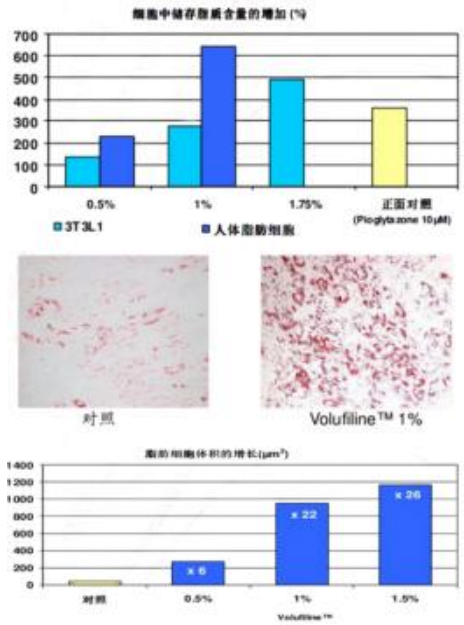

Topical fillers, facial plumping, and anti-fat atrophy

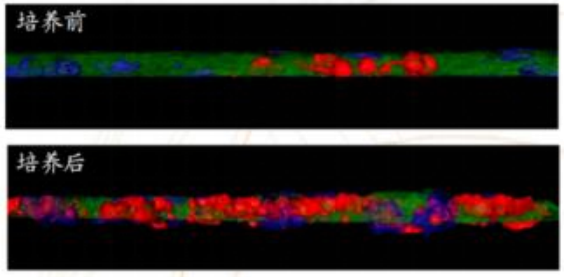

Brand efforts in 2026

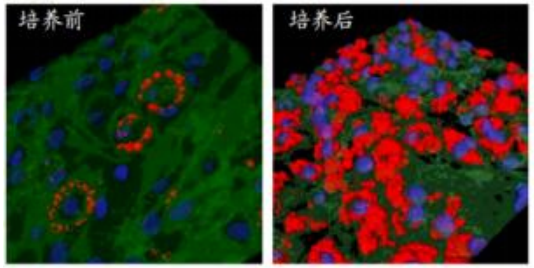

The Ordinary 92% Volufiline serum, and various rich, anti-aging serums

Volufiline's Abundant Mechanism
Fat Accumulation In Specific Areas

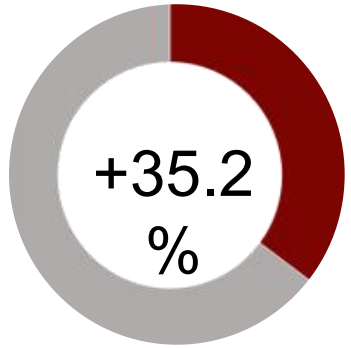

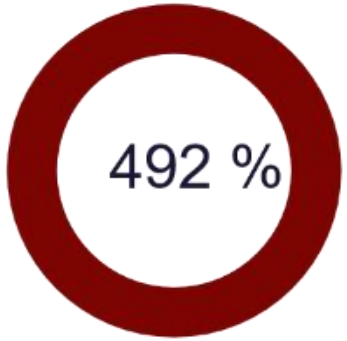

Preadipocyte Differentiation

Promote the maturation of adipocytes

Preadipocyte Proliferation

Promotes adipocyte proliferation

lipid storage

Promote lipid accumulation in adipocytes

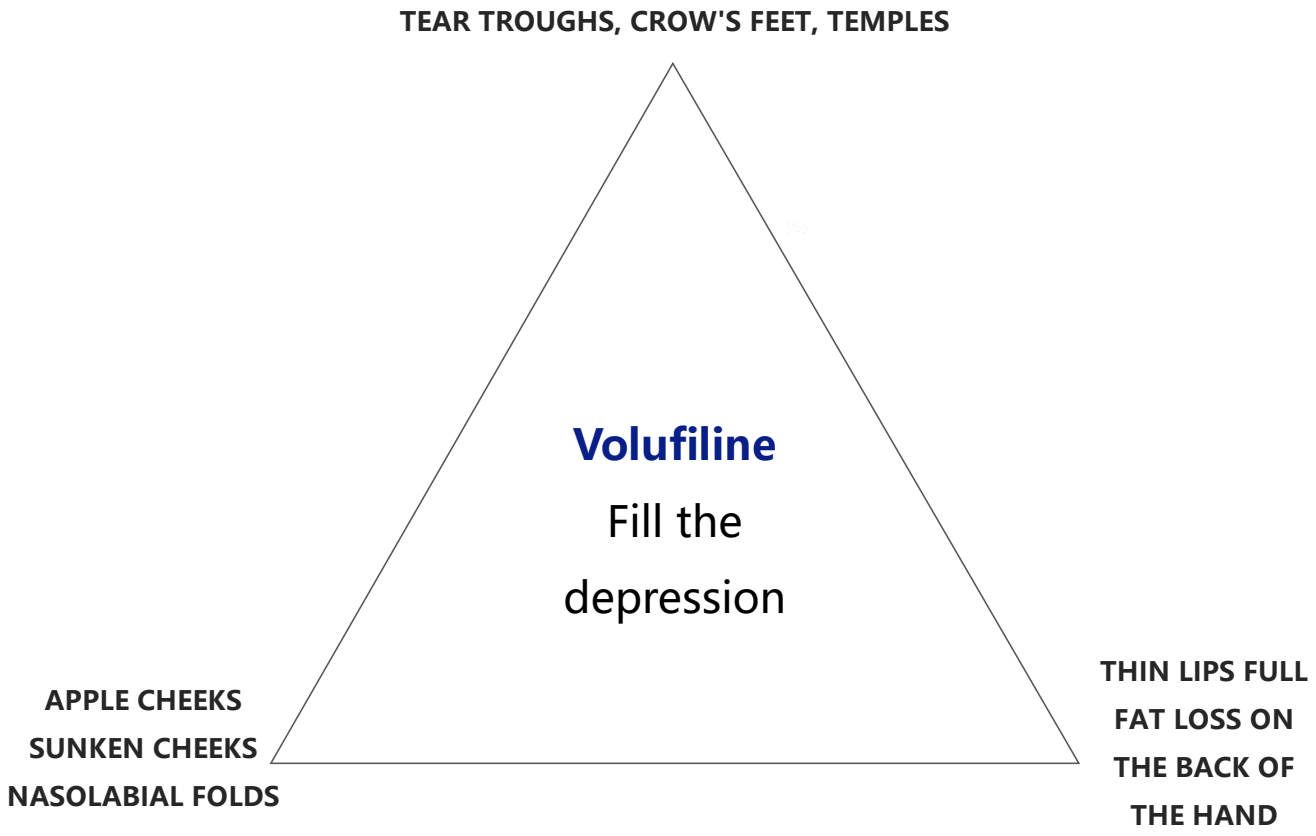

fat cell volume

Increase fat cell volume

AUTOLOGOUS AUGMENTATION

Fuller contours, reduced fine lines, and improved dryness and sagging.

Volufiline Autologous Regeneration Vs. Traditional External Filler

Comparison Dimensions	Traditional medical aesthetic fillers (Hyaluronic acid / collagen implants)	Topical Plumping Technology (Volufiline)
Core differences	External materials are "filled in".	**It grew back on its own skin.**
Working principle	Direct injection of exogenous materials, **physical occupancy and filling**	Activate autologous fat cell differentiation and regeneration **for endogenous gradual plumping**
Operation method	Professional doctor injection, invasive procedure	Home application, non-invasive, self-use
Risks and Safety	Risks include vascular embolism, redness and swelling, infection, and nodules.	Non-invasive, non-embolic, no risk of infection, and suitable for sensitive skin.
Reversibility of effect	The effects are irreversible and difficult to repair.	Natural and gradual, with controllable effects and no irreversible risks.
Speed of effect	Instant filling, immediate results	It takes effect in 4 weeks, and reaches the ideal state of fullness in 8–12 weeks.
Maintenance period	6–18 months, requiring repeated injections.	With long-term use and continuous accumulation, the effects steadily improve.
Single cost	High cost per session, huge long-term investment	Daily skincare cost, high cost-performance ratio, suitable for long-term use
Target audience	Healthy, tolerable skin, but with many contraindications.	high-end sensitive skin, mildly sensitive skin, and skin showing early signs of aging / mature skin.
Results-oriented	**"Stiffness," "mask-like appearance, " "steamed face"**	Highly compatible with skin **, natural, and with no risk of rejection.**

Traditional cosmetic fillers (such as hyaluronic acid and collagen) achieve immediate filling by directly injecting into specific layers, but this requires professional medical operation, carries the risk of embolism, and the effect is irreversible; over time, it is easy to cause a "stiffness", "mask-like appearance", or "smooth face".
Volufiline repairs sagging facial support structures in a non-invasive way, helping you gradually "restore" your slumped facial contours: no injections required, no risk of a stiff face, all the fullness comes from the activation and plumping of your own fat tissue.

Product Usage Effect

SELL WELL

VOLUFILINE PRODUCTS FOR SALE

- Essential for increasing body size
- Facial plumping and filling skin care

1. Pupa Push Me Up Firming and Enhancing Breast Cream
91% natural ingredients, contains Volufiline for plumping, reshaping and firming.

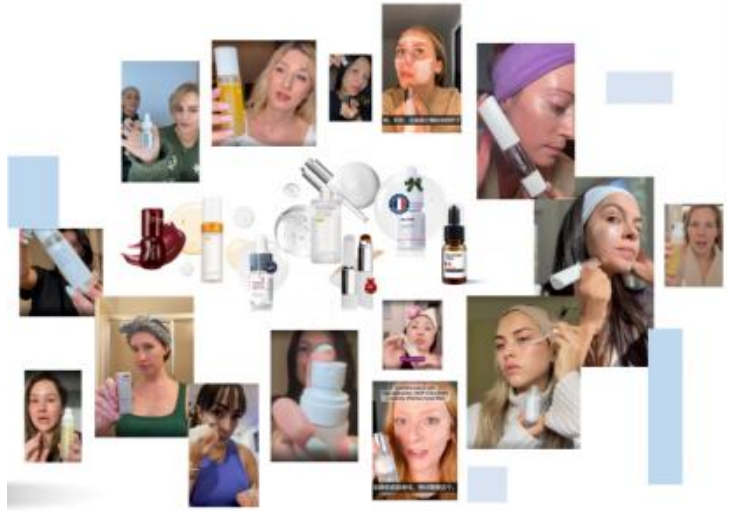

2. Divine Derriere Brazilian Buttock Firming Cream
Volufiline can transform sagging, loose skin into elastic skin by increasing the skin's fat content.

3. b.clinicx Breast Firming Cream
Contains 5% Volufiline, specially designed for breast care, a patented ingredient from SEDERMA (France).

1. The Ordinary Volufiline 92% + Pal-Isoleucine 1%
A targeted plumping serum, rich in volufiline, targeting the reduction of fat volume.

2. VOLUFILINE100 % FRANCE SEDERMA COSMETIC BOOSTERS.
Suitable for face and body, improves skin elasticity and reduces wrinkles.

3. Sungboon Deep Collagen Essence Cream
Volufiline firms and plumps fine lines and wrinkles, giving a youthful appearance.

4. Celestic Cosmeceuticals Lip Plumping Lipstick
Volufiline: A natural plant extract that stimulates fat cell growth for natural fullness.

5. Rajani MD Plasma Restore GLO – Volufilin Cream
The synergistic combination of gentle yet potent Volufilin and Vitamin C

HPR

Hydroxypinazone retinyl ester

"Hexagonal Warrior" suitable for sensitive skin

- **No conversion required, direct action:** HPR itself is a precursor form of retinoic acid, which can directly bind to retinoic acid receptors (RAR) in the skin without any additional conversion steps, and its bioavailability is close to that of retinoic acid.
- **Significantly reduced irritation:** The esterified structure buffers the direct skin irritation of retinoic acid, and clinical tests show that its irritation is only about 1/10 of that of traditional retinoic acid.
- **Significantly improved stability:** It exhibits superior resistance to light, heat, and oxygen compared to traditional retinol, resulting in a more stable formulation.

In the "hierarchy" of anti-aging active ingredients, retinoic acid (vitamin A acid) always stands at the top—it is the only topical drug officially approved by the US FDA for anti-aging, with the most sufficient clinical evidence and the most comprehensive efficacy.

TOP

FAST-ACTING

COMPREHENSIVE

HPR 's Six-Dimensional Anti-Aging Matrix **Comprehensive Coverage Of Core Anti-Aging Needs**

Sebum regulation

Reduce sebum secretion and improve oily skin.

Antioxidant defense

Significantly reduces the content of UV- induced lipid peroxidation products and reduces skin yellowing and darkening.

Epidermal metabolism

Accelerates the normal proliferation and differentiation of keratinocytes, and thickens the epidermis.

Promote collagen regeneration

Promotes the synthesis of type I and type III collagen and enhances the structural support of the dermis.

Elastin

Activate elastin gene expression to improve skin elasticity and firmness.

Reduce pigmentation

Inhibit tyrosinase activity to reduce melanin production at its source.

Dual -release retinol

Super A

Hydroxypinazone retinyl ester HPR

0 stimulation

Retinyl palmitate (Retinyl palmitate)

First-stage sustained release:

"Precision-type" third-generation retinoic acid

"Skip the conversion and act directly" HPR itself is the esterified form of retinoic acid, which can directly bind to retinoic acid receptors (RAR) in the skin .
HPR 's core advantages:

- **More direct onset of action** (acts directly on receptors, with high bioavailability)
- **Irritation is only 1/10 of that of traditional retinoic acid.**
- **Excellent stability** (superior resistance to light, heat, and oxygen compared to traditional retinol)
- **No tolerance period is required** ; it is directly applicable to consumers who are intolerant to retinol .

Second-stage sustained release:

"Gentle" A-ester

- Retinyl palmitate is an esterified derivative of retinol. It needs to be hydrolyzed by skin lipase to be converted into retinol, and then into retinoic acid. It has an extra step compared to retinol, and the conversion speed is gentler.
- Esterified structures are more resistant to light and oxygen, resulting in more stable formulations;
- It can more easily penetrate the sebum film to enter the deep layers of the skin, where it is stored in the sebaceous glands and adipose tissue, and slowly releases its activity.
- Clinical studies have shown that using a 0.1%-0.5% concentration for 12 weeks can significantly improve wrinkle depth.

"Dual sustained-release" synergistic logic:

HPR acts as the "strike force" to provide immediate and potent effects, while retinyl palmitate acts as the "reservoir" to provide long-tailed sustained release.
Traditional retinol formulations have a core contradiction: "The stronger the effect, the greater the irritation."
This series uses a "dual sustained-release retinol system" to solve this contradiction.

SPHERICAL POLYPEPTIDES

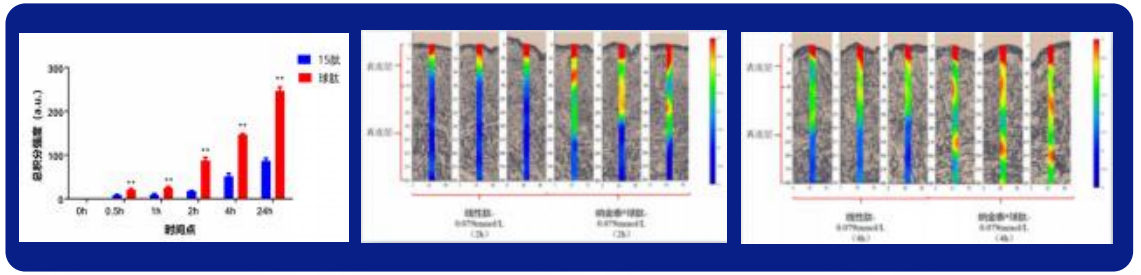

Ordinary polypeptides = naked delivery Easily damaged; difficult to reach the dermis

Globular peptides = Sealed cold chain express delivery Deep penetration and precise release of active ingredients

• Typical peptides (linear peptides): The molecular weight is usually between 500-3000 Da , which is far beyond the skin barrier's "500 Da absorption threshold", resulting in a large amount of active ingredients remaining on the skin surface, with an actual bioavailability of less than 10%.
• Cyclic peptides: These molecules form a ring structure by linking their ends together. Their structural stability is better than that of linear peptides, but their penetrability is still limited by their hydrophilic properties.
• Globular peptides: Lecithin encapsulates polypeptides into 50-200 nanometer spheres, combining lipophilicity and nanoscale particle size, resulting in a 393% increase in permeability and a nearly 5-fold increase in bioavailability.

Penetration rate reached 3 times+ Ultra stable
Topical anti-wrinkle globulins far surpass traditional linear peptides

High penetration
The microsphere structure easily penetrates the stratum corneum and reaches the skin's base layer.

High stability
Isolate from light, water, and air to prevent the ingredients from oxidizing and becoming inactive.

Gentle and skin-friendly
Encapsulated with lecithin , it's safe for sensitive skin to use.

High and long-lasting
Slow-release active ingredients for 24-hour continuous anti-aging

"Precision-guided" technology that penetrates the skin barrier
Far exceeding traditional 15-peptide, with more effective transdermal absorption.

around 50 nm
Intelligent dissociation

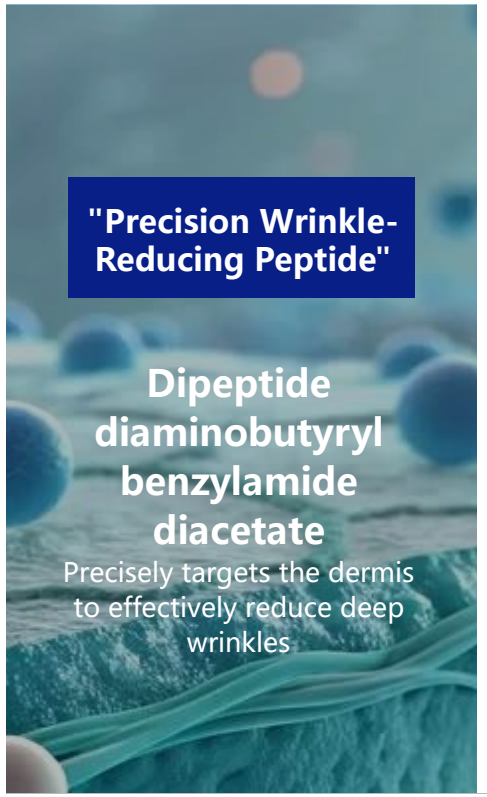

"COCKTAIL" STYLE FIVE-PEPTIDE MATRIX

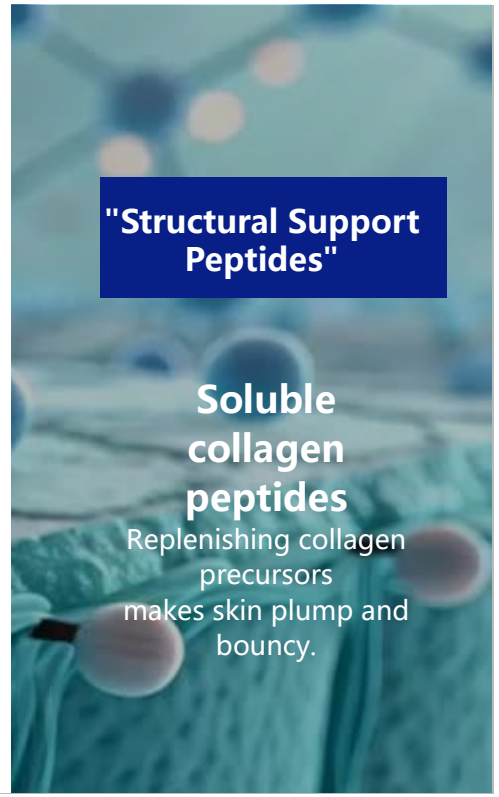

Surface Wrinkle Reduction + Mid-Layer Firming + Deep Layer Plumping + Full-Layer Repair

Super A-Peptide Oxygen-Infused Toner

Ingredients: Water, Butylene Glycol, Glyceryl Polyether-26, Glycerin, Sodium Chloride, Retinyl Palmitate, 0.3% Hydroxypinazone Retinate, Adenosine, Panthenol, Acetyl Glucosamine, Camellia Seed Oil, Paeoniae Radix Alba Root Extract, 4-tert-Butylcyclohexanol, Hydroxyacarboxylic Acid, Zingiberis Root Extract, Lactobacillus Ferment Lysate, Gellan Gum , Dipotassium Glycyrrhizate, Sodium Hyaluronate, Oat Beta- Glucan, Tripeptide-1, Hexapeptide-9, Acetyl Tetrapeptide-9, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7, Acetyl Hexapeptide-8

Texture: Microcapsule bubble essence water

Hydrates & Nourishes | Refines Skin Texture | Pure, Clear Radiance

① Anti-wrinkle and wrinkle-reducing efficacy chain

- **HPR 0.3%**
  → Acts directly on retinoic acid receptors
  → Promotes keratinocyte renewal and collagen fiber synthesis
  → Fine lines are reduced and skin texture is smoothed.
- **Retinyl palmitate**
  → Converted to retinoic acid
  → Gentle and continuous stimulation of collagen production
  → Long-term use improves the depth of wrinkles.
- **Complex peptides**
  → Precisely activate collagen at different target sites
  → End-to-end anti-aging.

② Barrier Repair and Enhancement

- **Lactobacillus fermentation lysate + oat β- glucan**
  → Balance skin flora
  → Less prone to sensitivity and redness.
- **Panthenol (Vitamin B5)**
  → Promotes skin barrier repair
  → Soothes the skin.
- **4-tert-butylcyclohexanol**
  → Inhibit TRPV-1 receptor
  → Quickly relieves skin sensitivity and stinging.

MICROCAPSULE SUSPENSION

Skin "Oxygen" Technology

10,000+ Concentrated Essence Beads – lock in freshness and penetrate deep into the skin
99:1 Precision Water-Oil Ratio — It absorbs better when it touches the skin and turns into water.

① Microencapsulation technology
• Microcapsule particle size: micron-sized bubbles (10-100 μm)
• Encapsulated ingredients: Retinyl palmitate, active peptides
• Technological advantages: Protects the stability of active ingredients and controls the release rate
② Dual sustained-release retinol system
• Retinyl palmitate: Oil-soluble, slow-release, prolongs duration of action.
• HPR (0.3%): Direct-acting, requires no conversion, reduces stimulation
Synergistic effect: Rapid onset of action + sustained release, all-day anti-aging

BESTSELLING PRODUCT COMPARISON

① U-Time Nourishing and Brightening Microcrystalline Bubble Water

• Technological barriers: The combination of microcapsule bubble technology, retinol, and peptide triple technology.

• Enhanced efficacy: upgraded from "brightening" to "reducing wrinkles and fading fine lines".

② ANUA PDRN Collagen Glow Facial Serum Spray

ANUA 's PDRN and collagen are easily deactivated and have large molecular weights, making it difficult for them to penetrate into the dermis.

supramolecular microencapsulation technology to break down large active ingredients into nano-sized molecules, while keeping them encapsulated in microcapsules to maintain their activity. Its penetration rate is 4 times that of ANUA , allowing it to act directly on the dermis layer of the skin to maximize its efficacy.

3%Volufiline Spherical Peptide Firming Serum

Ingredients: 3% Volufiline, Retinyl Palmitate, 0.3% Hydroxypinazone Retinate, Cyclopentasiloxane, Algae Extract, Glycerin, Dimethicone, Polysiloxane-11, Isononyl Isocarboxate, Phytosphingosine, Cholesterol, Lemon Peel Extract, Lavender Oil, Sea Fennel Extract, Yeast Extract, Sweet Almond Oil, Rosemary Leaf Oil, Basil Oil, Magnesium Gluconate, Copper Gluconate, Niacin, Zinc Gluconate, *Cyclomonella* Ferment Extract, Tocopherol (Vitamin E), Chlorella Extract, Lecithin, Acetyl Hexapeptide-8, Arginine/Lysine Peptide, Diaminobutyrylbenzylamide Diacetate, Collagen Peptide (Soluble Collagen), Hydrolyzed Ginsenosides, Oligopeptide-1, Peach Resin Extract, Bifida Ferment Lysate, Hydrolyzed Sodium Hyaluronate, Sodium Hyaluronate

Texture: velvety soft texture

Precisely Concealed Texture And Targeted Lifting

① Volufiline Fullness Effect Chain

→Activation of PPARγ/COPS3/COPS5 pathway
→Adipocyte differentiation and proliferation
→ Adipocytes increase in size (26 times)
→ Facial depression filling
→ Improvement of nasolabial folds/marionette lines.
Extracellular matrix regeneration
→ Enhanced support in the dermis layer
→ Contour Enhancement

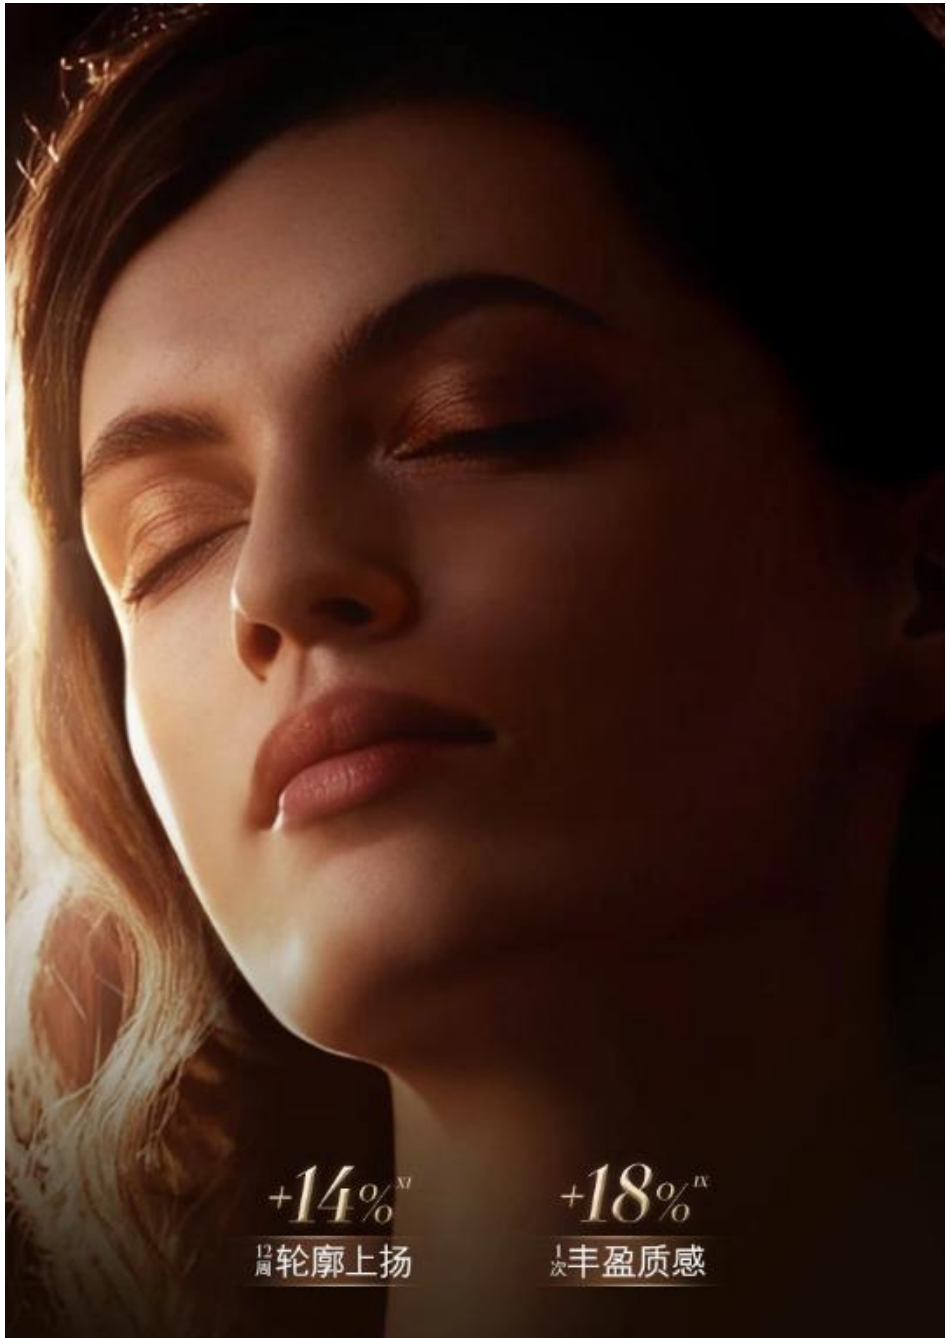

② Multidimensional anti-aging matrix

● Retinyl palmitate + HPR (0.3%)
→ Promotes collagen synthesis and accelerates cell renewal.
● Anti-wrinkle globulin
→Lift facial muscles → Improves expression lines
→ Improves skin elasticity.

③ Barrier repair and soothing

● Sea fennel extract + Chlorella extract
→ Promotes skin barrier repair → Strengthens skin defense.
● Yeast extract + Bifida ferment lysate
→ Regulate the skin's microecology → Maintain healthy skin.

3%Volufiline Spherical Peptide Firming Serum

New "Transmembrane Conductivity Technology"

A penetrating delivery system specifically designed for the triple active ingredients Volufiline + HPR + lecithin globulin.
By mimicking the structure of the skin's biomembrane, it achieves rapid penetration, efficient delivery, and deep-layer efficacy.
the three major pain points of traditional anti-aging ingredients: **poor penetration, poor retention, and slow onset of action .**

2x Speed

Faster penetration, no waiting, no sticky residue.
softens and absorbs into the skin within 10 seconds, leaving no stickiness or residue.
• Active ingredients reach deep layers of the epidermis in 1 minute
• Enters the dermal layer of the skin in 5 minutes, quickly activating the anti-aging pathway.

2.5 Times More Effective

More powerful anti-aging, one bottle is equivalent to two and a half bottles
• Microspheres are sealed and protected to prevent photolysis, oxidation, and deactivation.
• Targeted release, highly effective only in the dermis layer
• Ingredient utilization rate increased to over 50%

Instantly Reaches The Skin's Base

Deeper effects, plumping and firming from the skin's base.
• Breakthrough in three skin layers: epidermis → dermis → subcutaneous junction
• Epidermis: A strong skin barrier; • Dermis: Promotes collagen and elastin production.
• Subcutaneous junction area: Optimal application point for Volufiline fat grafting

BESTSELLING PRODUCT COMPARISON

① La Mer The Concentrate

La Mer Miracle Broth™ , primarily for repair;

This product contains 3% Volufiline, which primarily targets plumping and lifting.

②MEDITHERAPY Retinal Skin Booster Serum

• MEDITHERAPY serum features retinaldehyde for brightening and rejuvenating the skin, without any filler or firming effects;

This product combines 3% high-concentration Volufiline, 0.3% HPR retinol , and a multi-spherical peptide matrix. The three core ingredients work synergistically to achieve four effects in one: "filling, firming, wrinkle reduction, and repair." Its efficacy far exceeds that of the MEDITHERAPY formula, while its gentleness is greatly improved, making it safe for sensitive skin.

5% Volufilin Anti-Wrinkle Serum Oil

Ingredients: Cyclopentasiloxane, Dimethicone, Dimethicone Crosspolymer, 5% Volufiline, Tocopheryl Acetate, Ganoderma lucidum Extract, Jojoba Seed Oil, Meadowfoam Seed Oil, Argan Seed Oil, Olive Fruit Oil, Lime Peel Oil, Caprylic/Capric Triglycerides, Squalane, Bisabolol, Sea Fennel Extract, Globe Amaranth Extract, Sunflower Seed Oil Unsaponifiables, Tocopherol (Vitamin E), Sunflower Seed Oil, Geranium Flower Oil, Ylang Ylang Oil, Carrot Root Extract, Carotene

Texture: Silky, semi-transparent, white, clear oil

The More Oil Is Used, The More Durable It Becomes, Moisturizing Dry Lines And Giving It A Soft Glow.

① Deep nourishing pathway

- **Squalane**
→Skin lipid barrier repair→Barrier strengthening
- **Jojoba seed oil**
→Similar to sebum structure→Deeply penetrates and nourishes
- **Meadowfoam seed oil**
→Highly stable plant oil→Long-lasting moisture retention
- **Argan kernel oil (Argan oil)**
→Rich in Vitamin E→ Antioxidant and Repairing

② Anti-wrinkle and firming pathway

- **5% Volufiline**
→ Fat cell activation→Skin becomes plump and elastic from within
- Globe Amaranth Extract: "Plant-based Botox"
→ Relax facial muscles → Reduce dynamic facial wrinkles (such as crow's feet, forehead wrinkles, nasolabial folds, etc.)

③ Soothe and repair pathways

- Olive fruit oil, bisabolol
→Anti-inflammatory and soothing→Reduces skin sensitivity
- Sea fennel extract
→Cellular Repair→Promotes Skin Regeneration

5% Volufilin Anti-Wrinkle Serum Oil

Whole Oil Molecular Extraction Technology

Truly Good Absorption Start With The Softness That's Within Reach.

It utilizes three core processes: **low-temperature supercritical separation, molecular-level precision sieving, and freshness-locking and sealing of active factors .**
The rare active ingredients in vegetable oils **are concentrated, purified to the extreme, and preserved without damage** .
the industry bottlenecks of traditional essential oils, which are characterized by " **heavy oil content, low activity, weak efficacy, and limited absorption ,"**
Achieve up to 40 times the concentration of active ingredients.

200-500Da
Better absorption

Similar In Structure To The Sebum Membrane
More skin-friendly

Continuous Penetration
Longer-lasting

Traditional essential oils
It contains a large amount of basic oils and a small amount of active ingredients, resulting in many impurities, low activity, easy oxidation, and weak efficacy.
It sits on the surface of the skin, absorbs slowly, and feels heavy.

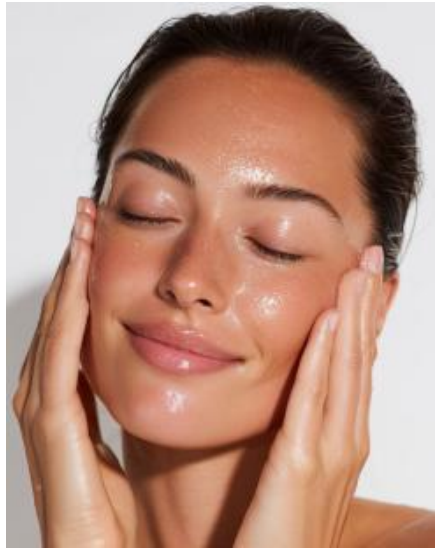

Molecular-level targeted purification
Impurity removal → purification → concentration → activation locking, leaving only "effective molecules".
impurities such as heavy metals, pesticide residues, oxides, odor molecules, and ineffective waxes from raw materials.
It fully preserves the rare oils such as meadowfoam seed oil, jojoba seed oil, argan kernel oil, and olive fruit oil.
Key functional substances include polyphenols, sterols, vitamins, and anti-aging factors.

5% Volufilin Anti-Wrinkle Serum Oil

ADVANCED OIL UNLOCK MORE USAGE COMBINATIONS

Effective Usage

(1) Intensive repair

Sensitive skin, seasonal changes, after sun exposure, after special treatments
Apply 5-6 pumps of the serum oil thickly to the entire face and gently press .
* It can be used in conjunction with a repairing mask if necessary.

(2) Mature skin oil method A

The oil-cream combination method involves adding 2-3 pumps of facial oil to the face cream before use.
The oil -A combination method involves using a serum oil after applying vitamin A products for repair.

(3) Skin Yoga

Combined with a massage stick and unique techniques
Lifting, soothing, and relaxing the skin

(4) Enhance makeup effect

Use a serum and facial oil as a base before applying makeup.
Fully moisturize the skin for a smoother, more even finish with foundation.

BESTSELLING PRODUCT COMPARISON

① La Mer The Renewal Oil

It mainly uses basic repairing ingredients such as algae extracts and plant essential oils, but lacks core anti-aging and filling ingredients, and can only achieve basic skin care with oil.

This product features a 5% ultra-high concentration of Volufilin, retinyl palmitate, and multiple high-end plant essential oils; these three core ingredients work synergistically.

It achieves comprehensive anti-aging through "high-concentration filling + anti-wrinkle firming + oil-based skin nourishment", improving facial sagging, depressions, fine lines and other problems from the root.

② Orchid Time Orchid Beauty Essence Oil

• It has a regular oily texture, feels sticky on the skin, and is prone to causing breakouts for oily skin and a sticky feeling on dry skin.

This product has a silky texture that melts upon contact with the skin. It is smooth, non-sticky, and absorbs quickly without pilling, clogging pores, or leaving a residue on the face. It is suitable for dry, oily, and sensitive skin.

③ SKIN1004 Madagascar Centella Asiatica Ampoule Facial Serum

• SKIN1004 serum features only a single ingredient, Centella Asiatica extract, which can only provide basic soothing and repair.

This product features a 5% ultra-high concentration of Volufilin + HPR + multiple high-end plant essential oils, achieving comprehensive anti-aging benefits through "high-concentration filling + anti-wrinkle firming + oil-based skin nourishment."

It addresses facial sagging, hollowing, and fine lines at their root, with efficacy far exceeding that of SKIN1004 's single-ingredient formula .

5%Volufiline Super A Sphere Peptide Anti-Wrinkle Cream

Ingredients: Water, Butylene Glycol, Isonononyl Isononanoate, 5% Volufiline, Retinyl Palmitate, 0.3% Hydroxypinazone Retinate, Cocoa Seed Butter, Dimethicone, Glycerin, 1,2-Pentanediol, Mannitol, Dipalmitoyl Hydroxyproline, Jojoba Esters, Lecithin, Hydroxypropyl Tetrahydropyrantriol, Sunflower Seed Oil, Globe Amaranth Extract, Tocopheryl Acetate, Raspberry Ketone, Haematococcus Pluvialis Extract, Glyceryl Glucoside, Soluble Collagen, Ceramide NP, Acetyl Hexapeptide-8, Arginine/Lysine Peptide, Oligopeptide-1, Dipeptide Diaminobutyrylbenzylamide Diacetate, Collagen Peptide (Soluble Collagen), Carnosine, Chlorella Extract, Ergothioneine, Lactic Acid, Licorice Flavonoids, Tocopherol (Vitamin E)

Texture: Off-white, smooth, creamy

Combating loose and sagging Reshape "firm, elastic, and youthful"

① Adipose tissue regeneration pathway
- **5% Volufiline**

→ Stimulates the generation and differentiation of adipocytes
→ Fill in facial depressions

② Collagen regeneration pathway
- **Diabetic A + Globular Peptide**

→ Promotes collagen and elastin synthesis
→ Improves skin elasticity and firmness
→ Improves skin laxity

③ Muscle relaxation pathway
- **Acetyl hexapeptide-8, snake venom peptide, conopodeptide**

→ Reduce excessive contraction of facial muscles
→Prevent and reduce dynamic wrinkles and expression lines

④ Barrier repair pathway
- **Ceramide NP , Oligopeptide-1, Chlorella**

→Promotes the regeneration of stratum corneum cells
→Enhance skin's tolerance and moisture retention.

⑤ Antioxidant pathway
- **Pro-Xylane, Ergothioneine, Vitamin E**

→ Eliminate free radicals and improve dull and yellow skin
→Enhances skin's radiance and translucency

5%Volufiline Super A Sphere
Peptide Anti-Wrinkle Cream

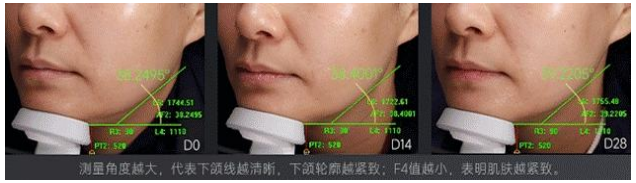

The data comes from a third-party testing agency and is based on efficacy evaluation data from 33 subjects after 28 days of continuous use (actual effects may vary from person to person).

CREAM THERAPY INFUSION FOR SKIN REJUVENATION

Water-in-oil nanoemulsion penetration technology

It softens automatically and integrates more quickly upon contact with the skin's body temperature.
Silky smooth feel + softens and absorbs easily + nourishes without feeling heavy or suffocating
Addressing the five major pain points of traditional anti-aging face creams: heavy, sticky, pilling, slow absorption, and breakouts.

BESTSELLING PRODUCT COMPARISON

① Kelijin Recombinant Collagen Revitalizing Lifting Firming Anti-Wrinkle Essence Cream (Film Cream)

• Dual anti-aging: Volufiline plumping + retinol to promote collagen (vs. Kelijin only provides collagen supplementation).

• Enhanced efficacy: Upgraded from "collagen replenishment" to " Volufiline plumping + collagen regeneration".

② Olay Face Moisturizer Regenerist Micro-Sculpting Cream

• Olay: Amino acid peptides + Niacinamide, promotes collagen production.

• Core ingredients of this product: 5% Volufiline for plumping + spherical peptides for firming.

5% Volufilin Super A Globular Peptide Plumping Eye Cream

Ingredients: Water, Glycerin, 1,2-Pentanediol, Cetearyl Alcohol, Dimethicone, 5% Volufiline, Caffeine, Hydrogenated Polyisobutylene, Retinol, Retinyl Palmitate, 0.3% Hydroxypinazone Retinate, Hydrolyzed Collagen, Dipotassium Glycyrrhizate, Allantoin, Tocopheryl Acetate, Euglena Polysaccharide, Laminaria Extract, Bifida Ferment Lysate, Lactobacillus Ferment, Meadowfoam Seed Oil, Oleic/Linoleic/Linolenic Acid Polyglycerides, Bacillus Bulb Polysaccharide, Tocopheryl Acetate, Edelweiss Callus Extract, Beeswax, Sodium DNA , Panthenol, Tocopherol (Vitamin E), Citric Acid , Sodium Hyaluronate, Jojoba Seed Oil, Ceramide NP, Cholesterol, Haematococcus pluvialis Extract, Kelp Extract, Ribonucleic Acid, Hydrogenated Lecithin, Sunflower Seed Oil, Ascorbyl Palmitate Acetyl hexapeptide-8, arginine/lysine peptide, oligopeptide-1, dipeptide diaminobutyryl benzylamide diacetate, collagen peptide (soluble collagen), purslane extract, oat beta- glucan, sea fennel extract, oligopeptide-1

Texture: Luxurious, smooth, and rich cream

First of its kind – 5% Volufiline applied around the eyes

Fuller tear troughs, plumper eye sockets, lighter dark circles, and no milia.

① Periocular plumping pathway

- **5% Volufiline**

→ Stimulates the generation and differentiation of adipocytes
→ Tear trough/eye socket filling

② Reduce wrinkles and tighten the skin

- **Acetyl hexapeptide-8, snake venom peptide, conopodeptide**

→ Reduce excessive contraction of facial muscles
→Reduces fine lines and crow's feet under the eyes

③ Pathways to improve dark circles

- **Caffeine**

→ Improved blood circulation → Reduced vascular dark circles
- **Ascorbyl palmitate + Vitamin E**

→Pigment metabolism→Lightening of pigmented dark circles

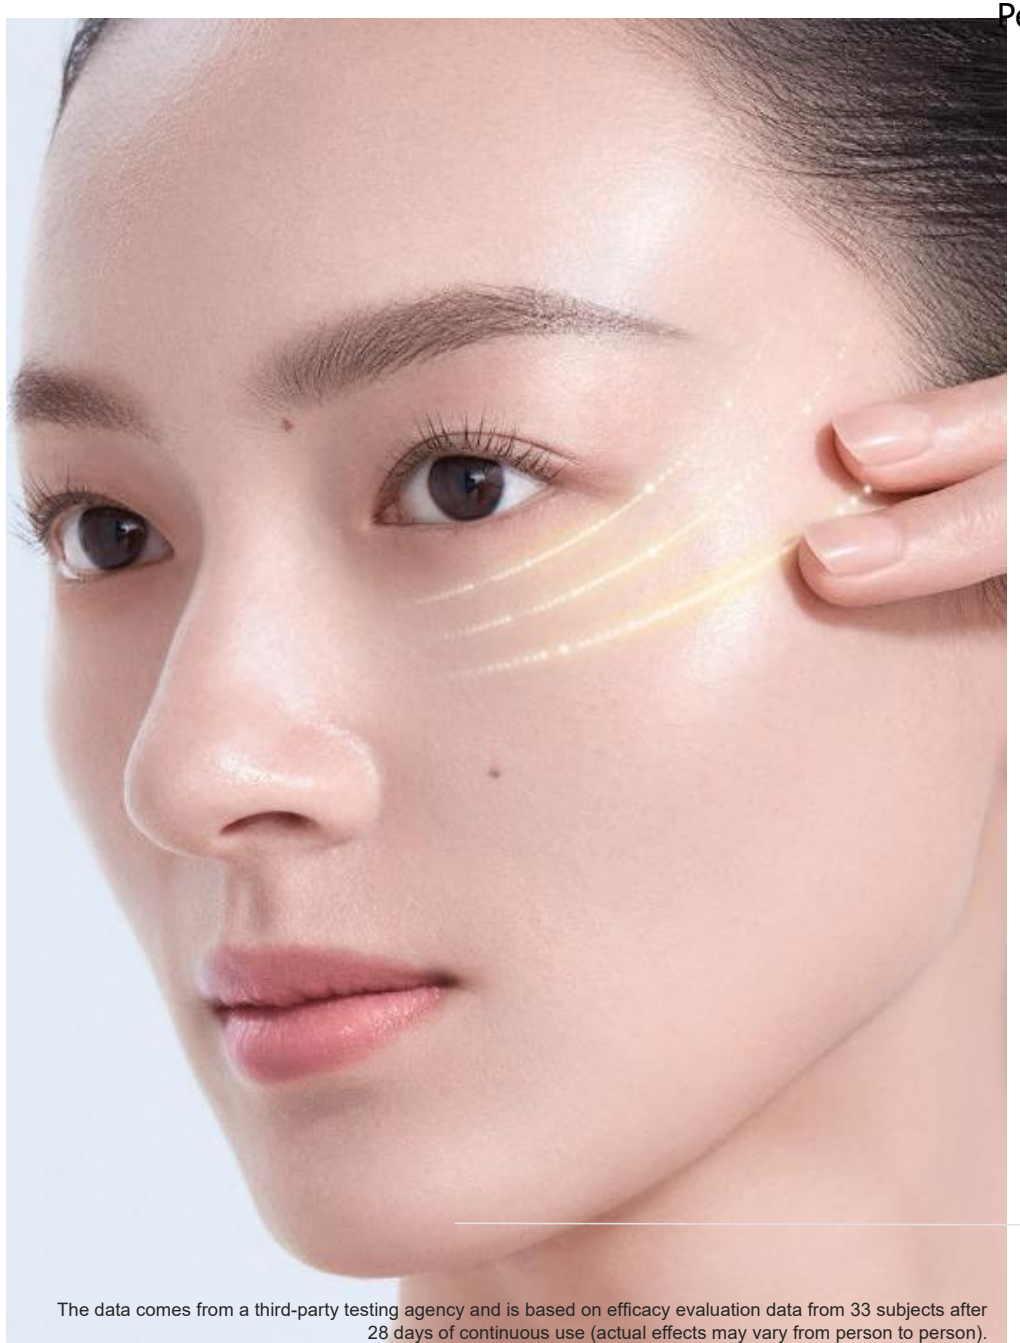

④ Barrier repair pathway

- **PDRN , RNA , Oligopeptide-1, Sea Fennel**

→Repairing cellular DNA damage caused by ultraviolet radiation
→Inhibit collagen degradation
→Strengthened skin barrier, plump and bouncy eye area

5% Volufilin Super A Globular Peptide Plumping Eye Cream

The data comes from a third-party testing agency and is based on efficacy evaluation data from 33 subjects after 28 days of continuous use (actual effects may vary from person to person).

Super Intelligent Sensing Film Technology

SMOOTH 0 PULLING 0 GRAININESS 0 ROUGHNESS

Moisturizing dry skin and oily skin

• Moisturizing without being oily: High moisturizing properties and low occlusiveness prevent heavy, sticky feeling and oil buildup.
Slow -release absorption: Moisturizing without being greasy, and doesn't stick to hands, pillows, or eyelashes.
• Suitable for all skin types: moisturizes dry skin, doesn't feel heavy on oily skin, gentle on sensitive skin, and won't cause milia with long-term use.

Under-eye wrinkles -35.05%
Tear trough lines - 38.33%

Eyelid wrinkles - 30.83%
Nasolabial folds - 10.41%

Cheek wrinkles - 31.98%
Neck wrinkles - 10.18 %

BESTSELLING PRODUCT COMPARISON

① La Prairie Caviar Supreme Eye Cream

• La Prairie's key ingredient: Caviar extract PDRN, primarily used to repair and improve dark circles around the eyes;

• Key ingredients of this product: 5% Volufilin for plumping (first application around the eyes) + peptides for anti-aging, caffeine + plant extracts to improve dark circles.

② CeraVe Eye Repair Cream

• CeraVe Repairing Eye Cream only features basic repairing ingredients such as ceramides and hyaluronic acid, without core anti-aging and filling ingredients, and can only achieve basic moisturizing and repair.

This product features a 5% high concentration of Volufilin , Retinol, and a spheropeptide matrix, achieving comprehensive anti-aging benefits including periorbital filling, super Retinol anti-wrinkle effects, spheropeptide firming, and barrier repair .

It addresses the root causes of problems such as sagging, hollowing, and fine lines around the eyes, with effects far exceeding those of CeraVe 's basic repair formula.

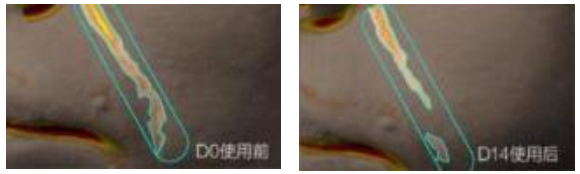

Volufiline Super A Globular
Peptide Anti-Wrinkle Series

Targeting 4 Major Signs Of Aging

" Sagging " **" Dent "** **" loose "** **" Multiple lines "**

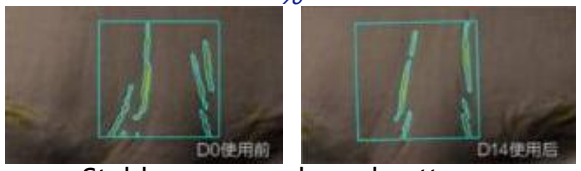

Volufiline (3%-5%) addresses facial **plumping** issues from the perspective of " **volume ".**
The spherical encapsulation of a five-peptide matrix addresses the issue of **fine lines and firmness from a structural perspective.**
The dual-release retinol system addresses skin **radiance and texture** issues from **a metabolic perspective.**

Stubborn nasolabial folds - *20.01 %*

Stubborn forehead wrinkles - *49.59 %*

Stubborn cross-shaped pattern - *30.15 %*

Subject Use Certification

97.4 % Subjects agree **Improved skin firmness**

100.0 % Subjects agree **Suitable for sensitive skin**

Improve tear troughs
Sagging cheeks Deepening of nasolabial folds
Sunken temples
Create a natural, youthful face youthful silhouette

KEY MAINTENANCE SEQUENCE

Volufiline Retinol Peptide

Anti-Wrinkle Series

01

Super A-Peptide Oxygen-Infused Toner

After cleansing, take an appropriate amount into the palm of your hand, massage it onto your entire face and pat it in gently until absorbed; for particularly dry skin / in winter, you can apply a wet compress with a cotton pad for 10-15 minutes.

02

3%Volufiline Spherical Peptide Firming Serum

Apply evenly to the face (forehead, cheeks, nose, chin), massaging from the inside out and from the bottom up until fully absorbed. Focus on key anti-aging areas such as nasolabial folds, cheekbones, and forehead. Can be used both morning and evening, but recommended as a primary anti-aging serum at night.

03

5% Volufiline Anti-wrinkle serum oil

Take 3-4 drops, rub them in your palms to warm them, and press them onto your face. You can use the "oil - cream combination method" to add 2-3 drops to your face cream to enhance the effect. For dry skin / in winter , you can use the "oil mask method" to apply 5-6 drops thickly to your entire face for intensive repair.

04

5 % Volufiline Super A Peptide Plumping Eye Cream

After applying serum/oil in the morning and evening, take a pea-sized amount on your ring finger and dot it around the eyes (inner corner → outer corner → lower eyelid → upper eyelid). Gently massage with the ceramic applicator or your ring finger until absorbed. Recommended technique: Pat gently with your ring finger for 30 seconds → Massage in circular motions for 10 seconds → Gently pull upwards towards the temples 5 times.

05

5%Volufiline Super A Sphere Peptide Anti-Wrinkle Cream

As the last step in skincare (night cream), apply an appropriate amount with lifting massage techniques; focus on applying vertically to the nasolabial folds area and lifting along the jawline area.

Thank you
